Job Description

Job Description: We need freshers with good knowledge of Salesforce. They should be confident enough to present themselves and the reasoning behind the logic. The candidate should be eager to learn and understand the new technology. The candidate should be quicker in understanding the requirement from the clients and should come up with the solution for the requirement.

Roles and Responsibilities:

1. Develop and implement new software programs, coding and design.
2. Maintain and improve the performance of existing software
3. Clearly and regularly communicate with management and technical support colleagues
4. Design and update software database
5. Test and maintain software products to ensure strong functionality and optimization
6. Recommend improvements to existing software programs as necessary.
7. End user support and Training, Project Management collaboration and communication.

1. Post Joining Test- Post joining, the company will be conducting 3 tests within 3 months of training and is mandatory for a candidate to clear this test to continue their employment with Cloud Analogy.

2. Bond Agreement- The candidate will be under 2 year Bond agreement, in case of breach of agreement the employee will be liable to pay Rs. 4,00,000 along with other benefits and the said amount is just and reasonable. Also a soft copy of Bond agreement will be given on the first day of joining itself

3. Relocation Policy- It is compulsory to relocate within 10 km from company premises.
